- **Benefit:** Reduces stress, anxiety, and improves sleep quality.
- **Info:** Calms the mind and reduces stress hormones.

Vacha (*Acorus calamus* - Rhizome)

- **Benefit:** Enhances memory and concentration.
- **Info:** Supports cognitive function and reduces anxiety.

Arjun (*Terminalia arjuna* - Bark)

- **Benefit:** Supports cardiovascular health, maintaining blood pressure and cholesterol levels.
- **Info:** Acts as a cardiotonic, strengthening heart function.

Giloy (*Tinospora cordifolia* - Stem)

- **Benefit:** Balances the immune system and supports overall health.
- **Info:** Modulates the immune response and improves immune function.

Jyotishmati (*Celastrus paniculatus* - Seed)

- **Benefit:** Enhances memory and mental clarity.
- **Info:** Supports cognitive function and brain health.

Satpushpa (Fennel Fruit)

- **Benefit:** Aids digestion and relieves digestive discomfort.
- **Info:** Acts as a carminative and soothes the digestive tract.

Ela (Cardamom - Seed)

- **Benefit:** Improves digestion and relieves indigestion.
- **Info:** Acts as a digestive aid and reduces bloating.

Heart of Wellness: A Synergetic Blend for Cardiac Care

Safeguard your heart with our Cardiac Care Syrup, a meticulous blend of ancient Ayurvedic herbs specifically chosen to nurture your cardiovascular system. Each ingredient serves a unique purpose, working in harmony to support heart health, reduce stress, and promote overall wellness.

Rely on the wisdom of Ayurveda to ensure your heart functions at its peak. Our Cardiac Care Syrup is designed to be your daily dose of heart wellness, supporting you through the stresses and strains of modern life.

Cardiac Care Syrup

KEY CONSTITUENTS:

Arjun (*Terminalia arjuna* - Stem Bark)

- **Benefit:** Supports heart health by maintaining healthy blood pressure and cholesterol levels.
- **Info:** Arjuna acts as a cardiotonic and helps strengthen heart muscles and improve cardiac function.

Ashwagandha (*Withania somnifera* - Root)

- **Benefit:** May reduce stress, which can indirectly benefit heart health.
- **Info:** Acts as an adaptogen, regulating stress hormones.

Punarnava (*Boerhavia diffusa* - Root)

- **Benefit:** Supports kidney function, which can have a positive impact on heart health.
- **Info:** Acts as a diuretic, aiding in fluid balance and reducing strain on the heart.

Pushkarnool (*Inula racemosa* - Root)

- **Benefit:** Traditionally used for respiratory conditions, which can ease the burden on the heart.
- **Info:** Acts as a bronchodilator, improving respiratory function.

Gokshura (*Tribulus terrestris* - Fruit)

- **Benefit:** Supports urinary and kidney health, indirectly benefiting the heart.
- **Info:** Acts as a diuretic and helps maintain fluid balance.

Jatamansi (*Nardostachys jatamansi* - Rhizome)

- **Benefit:** Reduces stress and anxiety, potentially lessening the impact of stress on the heart.
- **Info:** Acts as a sedative, calming the mind and reducing stress hormones.

Vanslochan (Bamboo Manna)

- **Benefit:** Supports kidney function and helps in maintaining fluid balance.
- **Info:** Acts as a diuretic and aids in fluid management.

Brahmi (*Bacopa monnieri* - Whole Plant)

- **Benefit:** May reduce stress and enhance cognitive function, which can indirectly benefit the heart.
- **Info:** Enhances neurotransmitter activity and reduces stress.

Shilajit (Mineral Pitch)

- **Benefit:** Supports overall health and vitality, which can indirectly benefit heart health.
- **Info:** Contains minerals and fulvic acid with potential health benefits.

Sonoth (Zingiber officinale - Rhizome)

- **Benefit:** May reduce inflammation and support overall health.
- **Info:** Contains anti-inflammatory compounds.

Pippali (Piper longum - Fruit)

- **Benefit:** Supports digestion and may reduce inflammation.
- **Info:** Aids in digestion and reduces inflammation.

Elachi (Elettaria cardamomum - Seed)

- **Benefit:** Supports digestion and may help reduce blood pressure.
- **Info:** Acts as a digestive aid.

Kurubak (Buras) (Rhododendron arboreum - Flower)

- **Benefit:** Traditionally used for various health purposes, including potential cardiovascular benefits.
- **Info:** Specific actions may vary depending on preparation.

- **Benefit:** Traditionally used for various health issues, including skin conditions.
- **Info:** The specific actions and applications of Pittpapada may vary depending on the preparation and context.

Babbul (Acacia arabica - Heartwood)

- **Benefit:** Contains astringent and antimicrobial properties, which can benefit skin health and oral care.
- **Info:** Babbul is known for its astringent qualities and has applications in skin care and oral health.

Rohitak (Tecomella undulata - Stem Bark)

- **Benefit:** Used in Ayurveda for various health purposes, including potential skin benefits.
- **Info:** Rohitak's actions can vary based on the specific application and formulation.

Manjistha (Rubia cordifolia - Stem)

- **Benefit:** Known for its blood-purifying properties and support for skin health.
- **Info:** Manjistha is used to remove toxins from the blood, potentially improving skin complexion.

Daruharidra (Berberis aristata - Heartwood)

- **Benefit :** Supports skin health and possesses antimicrobial properties.
- **Info :** Daruharidra's astringent and antimicrobial actions can benefit the skin.

Sonth (Zingiber officinale - Rhizome)

- **Benefit :** May reduce inflammation and support overall health.
- **Info :** Contains anti-inflammatory compounds.

Draksha (Vitis vinifera - Fruit)

- **Benefit :** Rich in antioxidants, it helps protect the skin from free radical damage.
- **Info :** Draksha is used for its potential to neutralize free radicals, which can reduce skin damage.

Raktachandan (Pterocarpus santalinus - Heartwood)

- **Benefit :** Supports skin health and may have a cooling effect on the skin.
- **Info :** Raktachandan is known for its cooling properties and its application in skincare.

Chopchini

- **Benefit :** Traditionally used in Ayurveda for various health purposes, including potential skin benefits.
- **Info :** Chopchini's specific actions can vary based on preparation and application.

Kanchnar (Bauhinia variegata - Heartwood)

- **Benefit :** Supports skin health and may have astringent properties.
- **Info :** Kanchnar is known for its astringent qualities, which can benefit the skin.

Gorkhmundi

- **Benefit :** Used in Ayurveda for skin conditions, among other purposes.
- **Info :** Gorkhmundi's actions and uses can vary based on the formulation and context.

Pippali (Piper longum - Fruit)

- **Benefit :** May help with skin conditions due to its anti-inflammatory properties.
- **Info :** Pippali's anti-inflammatory effects can reduce skin irritation.

Sanay (Cassia angustifolia - Leaf)

- **Benefit :** Supports skin health and has soothing properties.
- **Info :** Sanay contains compounds that soothe and calm the skin.

Nagkesar (Mesua ferrea - Stamens/Flowers)

- **Benefit :** Used in skincare for potential skin health benefits.
- **Info :** Nagkesar's actions can vary based on the specific application.

Mulethi (Glycyrrhiza glabra - Stem)

- **Benefit :** Mulethi has anti-inflammatory and soothing properties, which can benefit the skin.
- **Info :** Mulethi is known for its anti-inflammatory effects, which can reduce skin irritation.

Sonth (Zingiber officinale - Rhizome)

- **Benefit :** May have anti-inflammatory properties beneficial for the skin.
- **Info :** Sonth's anti-inflammatory properties reduce skin irritation.

Vidanga (Embelia ribes - Fruit)

- **Benefit :** Traditionally used for skin issues and has potential skin benefits.
- **Info :** Vidanga's specific actions can vary based on the preparation and application.

Amitas (Argvadh) (Trichospora cordifolia - Leaf)

- **Benefit :** Supports overall skin health and well-being.
- **Info :** Amitas is used for various purposes, including potential benefits for skin health.

Daruharidra (Berberis aristata - Heartwood)

- **Benefit :** Supports skin health and has antimicrobial properties.
- **Info :** Daruharidra's astringent and antimicrobial actions can benefit the skin.

Usir (Acorus calamus - Root)

- **Benefit :** Supports skin health and may have soothing properties.
- **Info :** Usir contains compounds with soothing properties for the skin.

FlexiPure Syrup: Ultimate Care for Joints and Muscles

Give your joints and muscles the love they deserve with FlexiPure Syrup, a unique Ayurvedic formulation developed for optimal musculoskeletal health. Featuring a symphony of handpicked herbs, each dose delivers powerful anti-inflammatory and analgesic benefits to support a lifestyle free of discomfort.

FlexiPure Syrup—your partner for a pain-free, mobile life. Infused with the wisdom of Ayurveda, this elixir is a blend of nature and science aimed at soothing and revitalizing your joints and muscles.

Joint & Muscle Soothe Syrup

KEY CONSTITUENTS:

Shallaki (*Boswellia serrata* – Exudate)

- **Benefit:** Shallaki has potent anti-inflammatory properties and supports joint health by reducing inflammation and discomfort.
- **Info:** Shallaki is traditionally used for its effectiveness in joint care.

Sunthi (*Zingiber officinale* – Rhizome)

- **Benefit:** Sunthi, or ginger, has anti-inflammatory properties that help soothe joint and muscle discomfort.
- **Info:** Sunthi is well-known for its warming and soothing effects.

Punarnava (*Boerhavia diffusa* – Root)

- **Benefit:** Punarnava is a diuretic and anti-inflammatory herb that aids in reducing swelling and inflammation in joints.
- **Info:** Punarnava is valued for its role in managing inflammation.

Rasna (*Pluchea lanceolata* – Leaf)

- **Benefit:** Rasna helps alleviate joint and muscle discomfort, making it beneficial for musculoskeletal health.
- **Info:** Rasna is recognized for its pain-relieving properties.

Dashmool (A blend of ten roots)

- **Benefit:** Dashmool is a combination of roots traditionally used for joint and muscle support, especially in managing discomfort.
- **Info:** Dashmool is a classic Ayurvedic blend for musculoskeletal health.

Daruhaldi (*Berberis aristata* – Heartwood)

- **Benefit:** Daruhaldi has anti-inflammatory properties and may help manage joint and muscle discomfort.
- **Info:** Daruhaldi's active compounds contribute to its benefits.

Gokhu (*Tribulus terrestris* – Fruit)

- **Benefit:** Gokhu may support joint health and reduce discomfort, indirectly promoting muscle well-being.
- **Info:** Gokhu is used for its joint and muscle benefits.

Ashwagandha (*Withania somnifera* – Root)

- **Benefit:** Ashwagandha is an adaptogen that reduces stress, supports muscle health, and indirectly promotes joint comfort.
- **Info:** Ashwagandha aids in muscle relaxation and recovery.

Nagkesar (*Mesua ferrea* - Flower/Stamen)

- **Benefit:** Nagkesar has anti-inflammatory properties that can alleviate joint and muscle discomfort.
- **Info:** Nagkesar is known for its aromatic stamen used in Ayurvedic preparations.

Shatavari (*Asparagus racemosus* - Root)

- **Benefit:** Shatavari may help reduce muscle and joint discomfort, promoting overall well-being.
- **Info:** Shatavari is used for its general health benefits.

Vasa (*Adhatoda vasica* - Whole Plant)

- **Benefit:** Vasa is traditionally used for its anti-inflammatory properties and its role in joint and muscle support.
- **Info:** Vasa is valued for its respiratory and musculoskeletal benefits.

Vidhara (*Argyria speciosa* - Root)

- **Benefit:** Vidhara may aid in reducing muscle and joint discomfort, supporting overall musculoskeletal health.
- **Info:** Vidhara is known for its potential pain-relieving properties.

Vacha (*Acorus calamus* - Rhizome)

- **Benefit:** Vacha has calming effects on the nervous system, promoting relaxation and better sleep.
- **Info:** Vacha's soothing properties are beneficial for sleep support.

Guggulu (*Commiphora wightii* - Exudate)

- **Benefit:** Guggulu has anti-inflammatory properties and may aid in reducing pain and inflammation in the joints and muscles.
- **Info:** Guggulu is used to support joint health and comfort.

Kantkari (*Solanum xanthocarpum* - Root)

- **Benefit:** Kantkari is traditionally used for its anti-inflammatory properties, especially in supporting respiratory health.
- **Info:** Kantkari is valued for its role in respiratory and musculoskeletal well-being.

Erandmool (*Ricinus communis* - Root)

- **Benefit:** Erandmool is used for its anti-inflammatory and pain-relieving properties in managing joint and muscle discomfort.
- **Info:** Erandmool has a history of use in traditional medicine.

Amaltas (*Cassia fistula* - Fruit Pericarp)

- **Benefit:** Amaltas is traditionally used for its laxative properties and potential role in digestive health.
- **Info:** Amaltas is valued for its digestive benefits.

Giloy (*Tinospora cordifolia* - Stem)

- **Benefit:** Giloy is an immune booster that supports overall health and well-being.
- **Info:** Giloy is recognized for its immune-enhancing properties.

Nirgundi (*Vitex negundo* - Leaf)

- **Benefit:** Nirgundi has anti-inflammatory and analgesic properties that alleviate muscle and joint pain.
- **Info:** Nirgundi is known for its pain-relieving effects.

NariAmrit Syrup: The Essence of Women's Wellness Step into a world of balanced health and well-being with NariAmrit Syrup, an Ayurvedic marvel crafted exclusively for women. This comprehensive formula harmonizes hormonal balance, digestive health, and emotional tranquility, delivering a holistic approach to female wellness.

NariAmrit Syrup—four all-encompassing oils for health and well-being. Imbued with the age-old wisdom of Ayurveda, this remarkable blend synergizes nature and ancient knowledge, enveloping you in a circle of holistic wellness.

Women's Wellness Syrup

KEY CONSTITUENTS:

Suddha Kasis Bhasma

- **Benefit:** Suddha Kasis Bhasma is traditionally used in Ayurveda for its potential benefits in women's health, including balancing menstrual cycles.
- **Info:** This mineral-based preparation is valued for its role in promoting women's well-being.

Ashoka (Saraca asoca - Bark)

- **Benefit:** Ashoka is known for its role in women's reproductive health and helping manage menstrual issues.
- **Info:** Ashoka is traditionally used to support female well-being.

Shatavari (Asparagus racemosus - Root)

- **Benefit:** Shatavari is a renowned herb for women's health, known for supporting hormonal balance and reproductive health.
- **Info:** Shatavari is considered an adaptogen for women.

Dashmool (A blend of ten roots)

- **Benefit:** Dashmool is a classic Ayurvedic blend that may help women maintain hormonal balance and overall wellness.
- **Info:** Dashmool is a well-regarded formulation for women's health.

Nagarmotha (Cyperus rotundus - Root)

- **Benefit:** Nagarmotha may aid in maintaining hormonal balance and supporting digestive health in women.
- **Info:** Nagarmotha is known for its digestive and hormonal benefits.

Jamun (Syzygium cumini - Seed)

- **Benefit:** Jamun seed may support healthy blood sugar levels and metabolic health in women.
- **Info:** Jamun is valued for its role in maintaining metabolic balance.

Kamal (Nelumbo nucifera - Flower)

- **Benefit:** Gokhru may support joint health and reduce discomfort, indirectly promoting muscle well-being.
- **Info:** Gokhru is used for its joint and muscle benefits.

Baheda (Terminalia bellirica - Fruit)

- **Benefit:** Baheda is traditionally used for its potential role in digestive health and overall well-being in women.
- **Info:** Baheda is valued for its digestive benefits.

Harad (*Terminalia chebula* - Fruit)

- **Benefit:** Harad supports digestive health and overall wellness in women.
- **Info:** Harad is known for its digestive benefits.

Lodhra (*Symplocos racemosa* - Bark)

- **Benefit:** Lodhra is used for its potential benefits in maintaining hormonal balance and reproductive health in women.
- **Info:** Lodhra is valued for its role in women's health.

Amli (*Emblica officinalis* - Fruit)

- **Benefit:** Amli, or Indian gooseberry, is rich in vitamin C and supports overall well-being and immunity in women.
- **Info:** Amli is known for its immune-boosting properties.

Ashwagandha (*Withania somnifera* - Root)

- **Benefit:** Ashwagandha is an adaptogen that may help women manage stress, support hormonal balance, and promote overall health.
- **Info:** Ashwagandha is revered for its adaptogenic qualities.

Jatamansi (*Nardostachys jatamansi* - Root)

- **Benefit:** Jatamansi is used for its calming and stress-reducing effects on the mind and body in women.
- **Info:** Jatamansi is valued for its calming and soothing properties.

Bala (*Sida cordifolia* - Root)

- **Benefit:** Bala may help support overall well-being and energy levels in women.
- **Info:** Bala is known for its energy-enhancing properties.

Mango (*Mangifera indica* - Seed)

- **Benefit:** Mango seed is traditionally used for its potential benefits in maintaining digestive health and overall wellness.
- **Info:** Mango seed is valued for its digestive benefits.

Bel (*Ficus bengalensis* - Bark)

- **Benefit:** Bel bark may help support digestive health and overall well-being in women.
- **Info:** Bel bark is known for its digestive properties.

Shalimi (*Bombax ceiba* - Exudate)

- **Benefit:** Shalimi may have a soothing and calming effect, promoting emotional well-being in women.
- **Info:** Shalimi is valued for its calming properties.

Bel (*Aegle marmelos* - Fruit)

- **Benefit:** Bel fruit may aid in digestive health and overall well-being in women.
- **Info:** Bel fruit is known for its digestive benefits.

Khair (Khadir) (*Acacia catechu* - Bark)

- **Benefit:** Khair, or Khadir, bark supports digestive health and overall well-being in women.
- **Info:** Khair bark is valued for its digestive properties.

Adrak (*Zingiber officinale* - Rhizome)

- **Benefit:** Adrak, or ginger, supports digestive health and overall wellness in women.
- **Info:** Adrak is well-known for its digestive benefits.

Bhringraj (*Eclipta alba* - Whole Plant)

- **Benefit:** Bhringraj may help maintain hair and skin health, promoting overall well-being in women.
- **Info:** Bhringraj is valued for its role in hair and skin care.

Safed Jeera (*Cuminum cyminum* - Fruit)

- **Benefit:** Safed Jeera, or white cumin, supports digestive health and overall well-being in women.
- **Info:** Safed Jeera is known for its digestive properties.

Devdaru (*Cedrus deodara* - Heartwood)

- **Benefit:** Devdaru supports overall well-being and may have calming effects on the mind and body in women.
- **Info:** Devdaru is valued for its calming properties.

Nagkesar (*Mesua ferrea* - Flower/Bud)

- **Benefit:** Nagkesar has potential anti-inflammatory properties that may promote overall well-being in women.
- **Info:** Nagkesar is known for its aromatic stamen used in Ayurvedic preparations.

Lavanga (*Syzygium aromaticum* - Flower/Bud)

- **Benefit:** Lavanga, or clove, supports digestive health and overall wellness in women.
- **Info:** Lavanga is well-known for its digestive properties.

Daichini (*Cinnamomum verum* - Bark)

- **Benefit:** Daichini, or cinnamon, may aid in digestive health and overall well-being in women.
- **Info:** Daichini is known for its digestive benefits.

Detox & Cleanse Syrup: The Pathway to Pure Living Unlock the secret to a purified life with our Detox & Cleanse Syrup, an Ayurvedic formulation blending nature's finest. From Triphala to Pudina, each ingredient is selected to detoxify, support digestive health, and elevate your overall well-being.

Your guide to a purified existence. Immerse yourself in the natural goodness and Ayurvedic wisdom that cleanses your body and rejuvenates your spirit.

Detox & Cleanse Syrup

KEY CONSTITUENTS:

Triphala (Fruits of Terminalia chebula, Terminalia bellerica, and Emblica officinalis)

- **Benefit:** Triphala is a renowned Ayurvedic formulation used for detoxification, digestive health, and overall well-being.
- **Info:** Triphala is a well-balanced combination of three fruits known for their cleansing properties.

Trikatu (A combination of Black Pepper, Long Pepper, and Ginger)

- **Benefit:** Trikatu is a digestive aid that may help improve metabolism, eliminate toxins, and support digestive health.
- **Info:** Trikatu is valued for its ability to enhance digestion and circulation.

Harad (Terminalia chebula - Fruit)

- **Benefit:** Harad supports digestive health and may help with detoxification and maintaining overall wellness.
- **Info:** Harad is known for its role in digestion and cleansing.

Pudina (Mentha - Leaf)

- **Benefit:** Pudina, or mint, aids in digestion, provides a refreshing flavor, and supports detoxification.
- **Info:** Pudina is known for its cooling and digestive properties.

Saindhav Lavan (Rock Salt)

- **Benefit:** Saindhav Lavan is a natural salt source that may aid in digestion and provide essential minerals.
- **Info:** Saindhav Lavan is valued for its purity and mineral content.

Dhania (Coriandrum sativum - Fruit)

- **Benefit:** Dhania, or coriander, supports digestion and may have detoxifying properties.
- **Info:** Dhania is known for its culinary and medicinal uses.

Jeera (Cuminum cyminum - Fruit)

- **Benefit:** Jeera, or cumin, supports digestive health and may aid in detoxification and overall well-being.
- **Info:** Jeera is valued for its digestive properties.

Vrikshamla (Garcinia cambogia - Fruit)

- **Benefit:** Vrikshamla is traditionally used to support weight management and metabolic health.
- **Info:** Vrikshamla is known for its potential in maintaining a healthy weight.

Weight Management Syrup: A Balanced Approach to a Healthier

You embark on your journey to optimal health with Weight Management Syrup, a specialized Ayurvedic blend crafted to support weight control and metabolic efficiency. Ingredients like Triphala and Amla Juice work in synergy to assist digestion, detoxification, and sustainable weight management.

Weight Management Syrup—Your ally for a balanced and healthier lifestyle. Infused with Ayurvedic knowledge, this exceptional blend supports you in achieving and maintaining your desired weight, naturally.

Weight Management Syrup

KEY CONSTITUENTS:

Triphala (A combination of Amalaki, Bibhitaki, and Haritaki - Fruits)

- **Benefit :** Triphala aids in digestion, detoxification, and weight management.
- **Info :** Triphala is valued for its role in improving digestion, cleansing the body, and supporting weight management.

Amla Juice (Embilica officinalis - Fruit)

- **Benefit :** Amla Juice, or Indian gooseberry, is rich in vitamin C and supports digestion and metabolism.
- **Info :** Amla is known for its potential to improve digestion and boost metabolism.

Vrikshamal (Garcinia indica - Fruit)

- **Benefit :** Vrikshamal, or Garcinia indica, is traditionally used for appetite control and weight management.
- **Info :** Vrikshamal is valued for its potential to help control appetite and support weight management.

- **Benefit :** Methi, or fenugreek seeds, may help regulate blood sugar and aid in weight management.
- **Info :** Methi is valued for its potential to support blood sugar control and weight management.

Aloe Vera Juice (Aloe barbadensis - Leaf)

- **Benefit :** Aloe vera juice supports digestion and may have detoxifying properties.
- **Info :** Aloe vera is known for its potential to improve digestion and detoxify the body.

Shuddha Guggulu (Commiphora wightii - Exudate)

- **Benefit :** Shuddha Guggulu is traditionally used for weight management and may help regulate cholesterol levels.
- **Info :** Shuddha Guggulu is valued for its potential to support weight management and cholesterol control.

Orange Peel (Citrus sinensis - Fruit Rind)

- **Benefit :** Orange peel aids digestion and may support weight management.
- **Info :** Orange peel is known for its potential to enhance digestion and support weight management.

Balancing Blood Sugar: A Symphony of Natural Regulators

Skilfully formulated to support healthy glucose levels, our Blood Sugar Balance Syrup brings together an array of Ayurvedic herbs known for their potential in managing blood sugar. Each ingredient is intentionally selected to harmonize bodily functions, emphasizing a balanced approach to glucose regulation. Dive into the legacy of Ayurveda and experience a new horizon of metabolic wellness.

Our meticulous formulation aims to encapsulate the finest Ayurvedic practices in a bottle, focusing on blood sugar regulation as a crucial component of overall health. Let the Blood Sugar Balance Syrup be your trusted companion in your journey towards a balanced, healthier you.

Blood Sugar Balance Syrup

KEY CONSTITUENTS:

Jambu (Syzygium cumini - Seed)

- **Benefit** : They may help in managing diabetes by reducing blood sugar levels.
- **Info** : Jambu seeds are known for their potential to support healthy blood sugar levels.

Amla (Phyllanthus emblica - Fruit)

- **Benefit** : It may help in improving immunity and managing blood sugar levels.
- **Info** : Amla, or Indian gooseberry, is rich in vitamin C and supports overall health.

Baheda (Terminalia bellirica - Fruit)

- **Benefit** : It may also help manage blood sugar levels.
- **Info** : Baheda supports digestive health and may aid in maintaining regular bowel movements.

Harad (Terminalia chebula - Fruit)

- **Benefit** : It may assist in blood sugar management.
- **Info** : Harad supports digestive health and may help with regular bowel movements.

Neem (Azadirachta indica - Leaf)

- **Benefit** : It may also play a role in managing blood sugar levels.
- **Info** : Neem supports skin health and may have detoxifying properties.

Guduchi (Tinospora cordifolia - Stem)

- **Benefit** : It may help in enhancing immunity and managing blood sugar.
- **Info** : Guduchi is traditionally used for immune support and overall well-being.

Gurmar (Gymnema sylvestre - Leaf)

- **Benefit** : It may help reduce sugar cravings and improve blood sugar control.
- **Info** : Gurmar is known for its potential to support healthy blood sugar levels.

Ashwagandha (Withania somnifera - Root)

- **Benefit** : It may assist in reducing stress, which can impact blood sugar levels.
- **Info** : Ashwagandha supports stress management and overall well-being.

Shatavari (*Asparagus racemosus* - Root)

- **Benefit** : Shatavari supports reproductive health and overall well-being.
- **Info** : It may help in balancing hormones and supporting blood sugar control.

Methi (Fenugreek Seeds)

- **Benefit** : Methi may help regulate blood sugar levels and support digestive health.
- **Info** : It contains soluble fiber that can improve glycemic control.

Turmeric (*Curcuma longa* - Rhizome)

- **Benefit** : Turmeric has anti-inflammatory properties and supports overall health.
- **Info** : It may help reduce inflammation and improve insulin sensitivity.

Chirayata (*Swertia chirata* - Bark)

- **Benefit** : Chirayata is traditionally used for digestive health and overall well-being.
- **Info** : It may help in maintaining digestive wellness and managing blood sugar.

Sonth (*Zingiber officinale* - Rhizome)

- **Benefit** : Sonth supports digestion and may have anti-inflammatory properties.
- **Info** : It can help in managing inflammation associated with diabetes.

Vijaysar (*Pterocarpus marsupium* - Heartwood)

- **Benefit** : Vijaysar may help manage blood sugar levels, which can be beneficial for overall health.
- **Info** : It has astringent properties that support blood sugar control.

Karela (*Momordica charantia* - Fruit)

- **Benefit** : Karela supports digestive health and may aid in blood sugar management.
- **Info** : It contains compounds that mimic the action of insulin.

Arjun (*Terminalia arjuna* - Bark)

- **Benefit** : It may help in maintaining healthy cardiovascular function, which is important for people with diabetes.
- **Info** : Arjun supports heart health and overall well-being.

Hair & Scalp Nourish Syrup: Your Daily Dose of Natural Hair Care

Revitalize your hair and nourish your scalp with our Hair & Scalp Nourish Syrup, a meticulously crafted herbal blend designed to promote healthy hair growth and scalp wellness. Each enriching drop combines a synergistic mix of nature's best ingredients, offering your hair and scalp the care they deserve.

Embrace the timeless wisdom of herbal remedies and give your hair and scalp the attention they need with our Hair & Scalp Nourish Syrup. It's more than a product—it's your daily ritual for vibrant and healthy hair.

Hair & Scalp Nourish Syrup

KEY CONSTITUENTS:

Bhringraj (Whole Plant)

- **Benefit:** It helps in nourishing hair follicles and enhancing hair growth.
- **Info:** Bhringraj is well-known for promoting hair health and is used to reduce hair loss and premature graying.

Aloe Vera (Leaf)

- **Benefit:** It can help reduce scalp irritation and dandruff while promoting a healthy scalp.
- **Info:** Aloe vera is recognized for its soothing and moisturizing properties.

Brahmi (Whole Plant)

- **Benefit:** It may strengthen hair roots and prevent hair fall.
- **Info:** Brahmi is traditionally used for cognitive support but can also promote hair health.

Manjistha (Stem)

- **Benefit:** It helps maintain a healthy scalp by purifying the blood.
- **Info:** Manjistha is known for its detoxifying and blood-purifying properties.

Usheer (Root)

- **Benefit:** It can help relieve scalp irritation and promote hair health.
- **Info:** Usheer is used in Ayurveda to treat various skin and hair issues.

Safed Chandan (Heartwood)

- **Benefit:** It can soothe an irritated scalp and support hair health.
- **Info:** Safed Chandan, or white sandalwood, is known for its cooling properties.

Shankpushpi (Whole Plant)

- **Benefit:** It helps reduce stress, which is linked to hair issues.
- **Info:** Shankpushpi is traditionally used for cognitive support but can indirectly promote hair health.

Ashwagandha (Withania somnifera - Root)

- **Benefit:** It can indirectly promote hair health by reducing stress.
- **Info:** Ashwagandha is an adaptogenic herb that supports overall well-being.

Bala (Whole Plant)

- **Benefit** : It helps in maintaining hair health and preventing hair loss.
- **Info** : Bala is known for its rejuvenating properties.

Mulethi (Stem)

- **Benefit** : It can soothe an irritated scalp and promote a healthy scalp.
- **Info** : Mulethi is used in traditional medicine for its soothing properties.

Jatamansi (Root/Rhizome)

- **Benefit** : It helps reduce stress, which can indirectly promote hair health.
- **Info** : Jatamansi is traditionally used to reduce stress and anxiety.

Amalaki (Fruit)

- **Benefit** : It can improve hair texture and promote hair growth.
- **Info** : Amalaki, or Indian gooseberry, is rich in vitamin C and supports overall health.

Daruhaldi (Heartwood)

- **Benefit** : It can help maintain a healthy and infection-free scalp.
- **Info** : Daruhaldi has anti-inflammatory and antibacterial properties.

Sariva (Root)

- **Benefit** : It can help reduce itching and inflammation of the scalp.
- **Info** : Sariva is traditionally used for skin conditions and can benefit the scalp.

Bakuchi (Seed)

- **Benefit** : It helps in treating skin conditions on the scalp, which may impact hair health.
- **Info** : Bakuchi is traditionally used for skin conditions but can also benefit the hair.

Nagarmotha (Root)

- **Benefit** : It helps in maintaining a healthy and infection-free scalp.
- **Info** : Nagarmotha is used in Ayurveda for its anti-inflammatory and antibacterial properties.

Draksha (Dried Fruit)

- **Benefit** : They can contribute to hair health by providing essential nutrients.
- **Info** : Draksha, or grapes, are rich in antioxidants and support overall health.

Vision Enhance Syrup: Your Daily Boost for Optimal Eye Health

Elevate your visual well-being with our Vision Enhance Syrup, a meticulously formulated herbal blend crafted to support and maintain healthy vision. Each enriching drop combines a harmonious mix of nature's finest ingredients, nurturing your eyes and enhancing your overall eye health.

Embrace the timeless wisdom of herbal remedies and invest in your eye health with our Vision Enhance Syrup. It's more than a product—it's your daily ritual for maintaining optimal vision and eye well-being.

Vision Enhance Syrup

KEY CONSTITUENTS:

Pippali (Fruit)

- **Benefit :** It may help protect eye cells from oxidative stress.
- **Info :** Pippali is known for its antioxidant properties.

Loha Bhasma (Iron Ash)

- **Benefit :** It is not widely recognized for its effects on vision.
- **Info :** Loha Bhasma is prepared from iron and is used in traditional medicine.

Mulethi (Stem)

- **Benefit :** It can help reduce eye irritation and inflammation.
- **Info :** Mulethi is traditionally used for its soothing properties.

Kankol (Branched Knotweed)

- **Benefit :** Limited information is available regarding its potential benefits for vision.
- **Info :** Kankol is not widely recognized for its effects on vision.

Sendha Namak (Rock Salt)

- **Benefit :** It is not directly associated with vision enhancement.
- **Info :** Sendha namak is a natural salt.

Bhringraj (Whole Plant)

- **Benefit :** It is primarily known for promoting hair health.
- **Info :** Bhringraj is not typically associated with vision support.

Badam (Almond - Fruit)

- **Benefit :** They may help maintain overall eye health.
- **Info :** Almonds are rich in vitamin E.

Kala Til (Black Sesame Seeds)

- **Benefit :** They may contribute to overall eye health.
- **Info :** Black sesame seeds are a good source of nutrients.

Amla (Fruit)

- **Benefit :** It supports overall health, which indirectly affects eye health.
- **Info :** Amla, or Indian gooseberry, is rich in vitamin C.

Neel Kamal (Blue Lotus – Flower)

- **Benefit :** It may help reduce eye strain and promote relaxation.
- **Info :** Blue lotus is traditionally used for its relaxing properties.

Sonoth (Ginger – Rhizome)

- **Benefit :** It can help reduce eye inflammation and irritation.
- **Info :** Sonoth has anti-inflammatory properties.

Kali Mirch (Black Pepper – Fruit)

- **Benefit :** It may support overall eye health.
- **Info :** Black pepper is known for its potential health benefits.

Bala (Whole Plant)

- **Benefit :** It is primarily known for promoting strength and vitality.
- **Info :** Bala is not widely recognized for its effects on vision.

Flax Seed (Seed)

- **Benefit :** They may contribute to overall eye health.
- **Info :** Flax seeds are rich in omega-3 fatty acids.

Choti Harad (Terminalia chebula – Fruit)

- **Benefit :** It may help improve digestion, which can indirectly affect overall health.
- **Info :** Choti harad supports digestive health but is not directly linked to vision.

Baheda (Terminalia bellirica – Fruit)

- **Benefit :** It may help maintain digestive wellness, which can indirectly impact overall health.
- **Info :** Baheda is known for its potential digestive benefits.

Kaddu Ke Beej (Pumpkin Seeds)

- **Benefit :** They may provide essential nutrients that support overall health.
- **Info :** Pumpkin seeds are a nutritious snack.

Gulaab Phool (Rose – Flower)

- **Benefit :** They can help reduce eye strain and promote relaxation.
- **Info :** Rose petals are traditionally used for their aromatic properties.

Genda Ka Phool (Marigold – Flower)

- **Benefit :** Marigold flowers are known for their vibrant colors.
- **Info :** Less petals are traditionally used for their aromatic properties.

Tulsi (Holy Basil – Whole Plant)

- **Benefit :** It may help reduce eye irritation and promote relaxation.
- **Info :** Tulsi is considered a sacred herb with various health benefits.

Palash (Flame of the Forest – Root)

- **Benefit :** Limited information is available regarding its potential benefits for vision.
- **Info :** Palash root is traditionally used but not widely recognized for its effects on vision.

Gajar (Carrot – Root)

- **Benefit :** They support overall eye health and vision.
- **Info :** Carrots are known for their high beta-carotene content.

Sweet Potato (Root and Tuber)

- **Benefit :** They provide essential nutrients for overall health.
- **Info :** Sweet potatoes are a nutritious food source.

Amla (Fruit)

- **Benefit :** It helps maintain overall well-being.
- **Info :** Amla is rich in vitamin C and supports overall health.

Seabuck Thorn (Fruit)

- **Benefit :** They may protect the eyes from oxidative stress.
- **Info :** Seabuckthorn berries are rich in antioxidants.

Beetroot (Root)

- **Benefit :** They may support overall eye health.
- **Info :** Beetroots are known for their deep red color and potential health benefits.

Aloe Vera (Leaf)

- **Benefit :** It can help reduce eye irritation and promote a healthy eye surface.
- **Info :** Aloe vera is recognized for its soothing and moisturizing properties.

Pediatric Wellness Syrups: Nurturing Your Child's Health Daily

Support your child's well-being with our Pediatric Wellness Syrups, specially formulated herbal blends designed to promote the health and vitality of growing youngsters. Each gentle drop combines a harmonious mix of nature's finest ingredients, caring for your child's holistic wellness.

Embrace the gentle wisdom of herbal remedies and provide your child with the care they deserve through our Pediatric Wellness Syrups. It's more than a product—it's a daily ritual for nurturing your child's health and vitality.

Pediatric Wellness Syrup

KEY CONSTITUENTS:

Ashwagandha (Root)

- **Benefit :** It may help reduce stress and anxiety, indirectly promoting a healthy appetite and growth in children by improving their overall well-being.
- **Info :** Ashwagandha is an adaptogenic herb that has been used in traditional Ayurvedic medicine for various health benefits.

Shatavari (Root)

- **Benefit :** It can potentially aid digestion and gastrointestinal health, which may indirectly support a child's appetite and growth.
- **Info :** Shatavari is a herb known for its traditional use in promoting female reproductive health and digestion.

Swet Musli (Root)

- **Benefit :** While not directly linked to appetite, it is believed to support overall health, which can indirectly impact a child's growth.
- **Info :** Sweet Musli is traditionally used as a general health tonic.

Haritaki (Fruit)

- **Benefit :** It may aid in digestion and gastrointestinal health, which can contribute to a child's appetite and overall growth.
- **Info :** Haritaki is well-known in Ayurveda for its digestive properties.

Amalaki (Fruit)

- **Benefit :** It can support overall health, immunity, and digestion, which indirectly affects appetite and growth in children.
- **Info :** Amalaki, or Indian gooseberry, is rich in vitamin C and antioxidants.

Atibala (Whole Plant)

- **Benefit :** It may help improve digestion and gastrointestinal comfort, which can indirectly promote appetite in children.
- **Info :** Atibala is traditionally used for its potential to support digestive health.

Haridra (Rhizome - Turmeric)

- **Benefit :** It has anti-inflammatory and digestive properties that can support appetite and overall health in children.
- **Info :** Turmeric, or Haridra, is a common spice with medicinal properties.

Yashtimadhu (Stem)

- **Benefit :** It may help soothe the digestive system and contribute to improved appetite in children.
- **Info :** Yashtimadhu is licorice root and is known for its sweet taste and potential health benefits.

Draksha (Fruit)

- **Benefit:** Grapes can be a healthy addition to a child's diet, providing essential nutrients that support growth and overall health.
- **Info:** Draksha refers to grapes, a nutritious fruit.

Kamal (Flower)

- **Benefit:** It may help reduce eye strain and promote relaxation.
- **Info:** Kamal, or lotus, is not typically used to promote appetite but can be part of a balanced diet.

Chitrak (Root)

- **Benefit:** It may aid digestion, reduce flatulence, and support appetite in children.
- **Info:** Chitrak is known for its digestive and carminative properties.

Jeera (Cumin - Fruit)

- **Benefit:** Cumin seeds can enhance the flavor of dishes and promote digestion, which can stimulate a child's appetite.
- **Info:** Jeera, or cumin seeds, are commonly used in cooking.

Ajwain (Bishop's Weed - Fruit)

- **Benefit:** It may help with digestion and reduce flatulence, indirectly promoting a healthy appetite in children.
- **Info:** Ajwain is traditionally used for its digestive properties.

Brahmi (Whole Plant)

- **Benefit:** While not directly linked to appetite, it may support mental and overall health, which can contribute to a child's growth.
- **Info:** Brahmi is often used to improve cognitive function.

Guduchi (Stem)

- **Benefit:** It can support the immune system, indirectly contributing to overall health and growth in children.
- **Info:** Guduchi is known for its immune-boosting properties.

Trikatu

- **Benefit:** Trikatu may enhance digestion and metabolism, which can promote a healthy appetite and growth in children.
- **Info:** Trikatu is a combination of three pungent herbs (ginger, black pepper, and long pepper) known for their digestive properties.

Embrace the timeless wisdom of herbal remedies and make the most of your golden years with our Senior Vitality Syrups. It's more than a product—it's your daily ritual for revitalizing your health and vitality as a senior.

Senior Vitality Syrup

KEY CONSTITUENTS:

Amalaki (Fruit)

- **Benefit:** It can support immune health, improve digestion, and provide overall health benefits for older individuals.
- **Info:** Amalaki, also known as Indian gooseberry, is a rich source of Vitamin C and antioxidants.

Arjuna (Bark)

- **Benefit:** It can potentially aid digestion and gastrointestinal health, which may indirectly support a child's appetite and growth.
- **Info:** Shatavari is a herb known for its traditional use in promoting female reproductive health and digestion.

Guduchi (Stem)

- **Benefit:** It can enhance the immune system, potentially improving overall health and resilience in older individuals.
- **Info:** Guduchi is known for its immune-boosting properties.

Ashwagandha (Root)

- **Benefit:** It can help manage stress, improve energy levels, and support overall well-being in older adults.
- **Info:** Ashwagandha is an adaptogenic herb known for its stress-reducing properties.

Brahmi (Root)

- **Benefit:** It may support brain health and cognitive function in older individuals.
- **Info:** Brahmi is often used to enhance cognitive function and memory.

Chitrak (Root)

- **Benefit:** It can aid digestion and support gastrointestinal health in older individuals.
- **Info:** Chitrak is traditionally used for its digestive and carminative properties.

Draksha (Fruit)

- **Benefit:** Grapes can provide antioxidants and may contribute to overall health and well-being in older adults.
- **Info:** Draksha refers to grapes, which are a good source of antioxidants.

Shallaki (Exudate)

- **Benefit:** It may help manage inflammation and support joint health in older individuals.
- **Info:** Shallaki, also known as Indian frankincense, is used for its anti-inflammatory properties.

Haritaki (Fruit)

- **Benefit :** It can aid digestion, reduce constipation, and promote gastrointestinal health in older individuals.
- **Info :** Haritaki is renowned for its digestive properties.

Tamaki (Leaf)

- **Benefit :** It may support liver function and overall health in older individuals.
- **Info :** Tamaki, also known as bhurni amra, is traditionally used in Ayurveda for liver health.

Mandukaparni (Whole Plant)

- **Benefit :** It can enhance brain health and mental clarity in older adults.
- **Info :** Mandukaparni is an adaptogenic herb known for its potential to improve mental alertness and cognitive function.

Musta (Root)

- **Benefit :** It may support digestion and gastrointestinal comfort in older individuals.
- **Info :** Musta, or Nutgrass, is traditionally used for its digestive and carminative properties.

Rasna (Leaf)

- **Benefit :** It can help manage inflammation and promote joint health in older individuals.
- **Info :** Rasna is known for its anti-inflammatory properties.

Shatavari (Root)

- **Benefit :** It may support overall health and well-being in older adults.
- **Info :** Shatavari is known for its traditional use in female reproductive health and as a general health tonic.

Swet Punamava (Root)

- **Benefit :** It may help manage water retention and inflammation in older individuals.
- **Info :** Punamava is used in Ayurveda for its diuretic and anti-inflammatory properties.

Trivrit (Root)

- **Benefit :** It can promote healthy bowel movements and alleviate constipation in older individuals.
- **Info :** Trivrit is traditionally used as a laxative.

Vasa (Root)

- **Benefit :** It can help maintain respiratory health and boost the immune system in older individuals.
- **Info :** Vasa is known for its respiratory and immune-supporting properties.

Lavanga (Flower Bud)

- **Benefit :** Cloves may provide relief from dental and respiratory issues and can be included in oral health practices.
- **Info :** Lavanga is cloves, known for their aromatic and medicinal properties.

Pippali (Fruit)

- **Benefit :** It can support digestion and metabolism in older individuals.
- **Info :** Pippali is long pepper, often used in Ayurveda for its digestive properties.

Sunthi (Rhizome - Ginger)

- **Benefit :** Ginger can aid digestion, alleviate nausea, and provide anti-inflammatory effects.
- **Info :** Sunthi refers to ginger, a commonly used spice with various health benefits.

Tamal Patra (Leaf)

- **Benefit :** Bay leaves may have mild anti-inflammatory and digestive properties.
- **Info :** Tamal Patra is bay leaves, known for their culinary and potential health benefits.

Marich (Fruit)

- **Benefit :** Black pepper can enhance the flavor of dishes and support digestion.
- **Info :** Marich is black pepper, widely used in cooking.

Gokshur (Fruit)

- **Benefit :** It may support urinary health and overall well-being in older individuals.
- **Info :** Gokshur, or Tribulus terrestris, is traditionally used for urinary and reproductive health.

Liver Care Syrup: Nourish Your Liver for Optimal Health

Give your liver the attention it deserves with our Liver Care Syrup, thoughtfully formulated herbal blends designed to promote liver health and overall well-being. Each revitalising drop combines a harmonious mix of nature's finest ingredients, supporting your holistic health.

Embrace the timeless wisdom of herbal remedies and prioritize your liver health with our Liver Care Syrup. It's more than a product—it's your daily ritual for nourishing and maintaining optimal liver health naturally.

Liver Care Syrup

KEY CONSTITUENTS:

Bhumi Amala (*Phyllanthus niruri*) (Whole Plant)

- **Benefit:** It may support liver health by protecting against liver damage and promoting detoxification.
- **Info:** Bhumi Amala, also known as *Phyllanthus niruri*, is traditionally used for its hepatoprotective properties.

Triphala (Fruit)

- **Benefit:** It can promote healthy digestion and detoxification, indirectly benefiting liver function.
- **Info:** Triphala is a combination of three fruits (amla, haritaki, and bibhitaki) known for their digestive and cleansing properties.

Rohitak (*Tecoma undulata*) (Bark)

- **Benefit:** It may help manage liver-related issues and support overall liver health.
- **Info:** Rohitak, also known as *Tecoma undulata*, has traditional uses in Ayurveda for liver disorders.

Punarnava (*Boerhavia diffusa*) (Root)

- **Benefit:** It can help manage water retention, reduce inflammation, and potentially support liver health.
- **Info:** Punarnava is known for its diuretic and anti-inflammatory properties.

Kasni (*Cichorium intybus*) (Seeds)

- **Benefit:** They can promote liver function and enhance digestion.
- **Info:** Kasni, or chicory seeds, are traditionally used for liver and digestive health.

Vasa (*Adhatoda vasica*) (Whole Plant)

- **Benefit:** It may support liver health and help alleviate respiratory issues often associated with liver disease.
- **Info:** Vasa, or *Adhatoda vasica*, is used in traditional medicine for its respiratory and hepatoprotective properties.

Bhringraj (*Eclipta alba*) (Whole Plant)

- **Benefit:** It may support liver function and overall well-being.
- **Info:** Bhringraj, or *Eclipta alba*, is traditionally used for liver disorders and hair health.

Sonth (*Zingiber officinale*) (Rhizome - Dry Ginger)

- **Benefit:** It can help improve digestion and reduce inflammation, indirectly supporting liver health.
- **Info:** Sonth is dried ginger and is known for its digestive and anti-inflammatory properties.

Daruharidra (*Berberis aristata*) (Rhizome)

- **Benefit:** It may help reduce inflammation in the liver and support overall liver health.
- **Info:** Daruharidra, or Indian barberry, has anti-inflammatory and antimicrobial properties.

Fumaria officinalis (Whole Plant)

- **Benefit:** It may aid in liver detoxification and promote liver health.
- **Info:** Fumaria officinalis is traditionally used for its detoxifying properties.

Vidanga (*Embellia ribes*) (Fruit)

- **Benefit:** It can help with digestion and potentially protect the liver from infections.
- **Info:** Vidanga, or Embellia ribes, is known for its antimicrobial and digestive properties.

Sharpunkha (*Tephrosia purpurea*) (Whole Plant)

- **Benefit:** It may support liver function and help manage liver-related issues.
- **Info:** Sharpunkha, or Tephrosia purpurea, is traditionally used for liver disorders.

Giloy (*Tinospora cordifolia*) (Stem)

- **Benefit:** It can enhance the immune system and potentially aid in liver health.
- **Info:** Giloy, or Tinospora cordifolia, is known for its immune-boosting properties.

Kumari (*Aloe barbadensis*) (Leaf)

- **Benefit:** It may help reduce liver inflammation and promote healing.
- **Info:** Kumari, or aloe vera, is used for its soothing and healing properties.

Dhaniya (*Coriandrum sativum*) (Fruit)

- **Benefit:** It can promote digestion and reduce inflammation, indirectly benefiting the liver.
- **Info:** Dhaniya, or coriander, is known for its digestive and anti-inflammatory properties.

Bhunimb (*Kalmegh*) (*Andrographis paniculata*) (Whole Plant)

- **Benefit:** It may support liver function and improve digestion.
- **Info:** Bhunimb, also known as Kalmegh, is traditionally used for liver and digestive health.

Katuki (*Picrorrhiza kurroo*) (Rhizome)

- **Benefit:** It may protect the liver from damage and improve its function.
- **Info:** Katuki, or Picrorrhiza kurroo, is known for its hepatoprotective properties.
